Profile

Full Stack Developer with hands-on experience in Angular, ASP.NET Core Web API, Entity Framework, and Microsoft SQL Server. Skilled in building end-to-end CRUD APIs, designing stored procedures. Worked on enterprise-level ERP modules, solo full-stack systems, and collaborative academic projects. Strong problem-solving ability, quick learning, and adaptable to real-world development workflows.

Work Experience

Full Stack Intern – [Danfe Solution Pvt. Ltd.](#)

07/2024 – 09/2024 | Kathmandu, Sinamangal

Tech Stack: SQL Server, T-SQL, ASP.NET Core Web API (.NET 8), Angular 17, Git, GitHub

- Built complete CRUD APIs and stored procedures for ERP modules including Denomination, Office Denomination, Company Denomination, Customers (Person & Organization), and Printer Settings.
- Developed backend logic for bulk insert, update, and delete operations using optimized stored procedures.
- Designed API structure, form logic, and UI behavior while working with Angular services, dependency injection, interceptors, and reactive forms.
- Collaborated with developers, participated in debugging sessions, and improved SQL and UI workflows through team feedback.
- Used Git for source control, resolved merge conflicts, and maintained clean, readable code across modules.

Education

BSc (Hons) Computing – Itahari International College
05/2023 – 07/2025 | Itahari, Nepal

Technical Skills

Frontend

Angular CLI, Angular Material, TypeScript, Lazy Routing, Dependency Injection

Backend

ASP.NET Core Web API, Entity Framework Core, Fluent API, LINQ.

Database

Microsoft SQL Server, T-SQL, Stored Procedures, Database Design (ERD, 3NF), Transactions & Concurrency Control

Tools

Git & GitHub, Postman, Swagger, SSMS, Visual Studio, VS Code

Soft Skills

Problem-solving, debugging under pressure, clear communication, adaptability, documentation writing, code reviews, improved time management

Projects

E2-Dynamics – E-commerce with ERP

Tech Stack: SQL Server, ASP.NET Core Web API, Angular 17
11/2024 – 04/2025

- Designed database schema using ERD and normalization.
- Built stored procedures for CRUD, bulk operations, and JSON data handling.
- Integrated Angular frontend with backend APIs using reactive forms and validation.
- Implemented middleware, authentication flow, custom interceptors, and RxJS-based state management.
- Created reusable UI components including confirmation dialogs and snackbars.

Pustaksathi – Online Book Store (Group Project)

Tech Stack: ASP.NET Core Web API, EF Core, Angular, PostgreSQL

04/2025 – 05/2025

- Built backend using EF Core, Fluent API, LINQ queries, transactions, and exception handling.
- Developed DTOs, services, and CRUD logics.
- Implemented pagination, filtering, and sorting in backend services.
